

REALIZING THE DIVINE NATURE OF YOUR CONNECTION WITH GOD

A Discourse from Master Serapis Bey

There are many topics we have covered in this eight weeks, but the most recurring theme is 'connectivity' with Source. And here again, in this final unit, we will explore the Divine Nature of Connectivity.

Let me categorize it with many different lenses. In your work with thought verses consciousness, you found that to hold thought is transitory while holding a state of consciousness is nourishing and long-lasting. Likewise Enlightenment taught you the value of a clear, open acceptance of inner Divinity, in that ego was to be managed or reined in so that the inner life of Spirit could be recognized. This included the clearing of clouds of darkness or what is referred to as the 'negative ego' to be set aside, while cultivating healthy and sacred states of wholeness. This too is connectivity. For one must contact the inner Godhood before one can connect the Higher Aspects of Heaven, and thence the Creator.

You learned of the importance of Light within the four-seven body system and the co-creation of states of 'will to good' that foster ever greater Light quotient within your five bodies. At the same time, you learned about the 'Merkabah' and its role in your connectivity, especially concerning the Higher aspects of Heaven. So that you have come to understand that there are many forms of Merkabah that assist you on your journey of connectivity.

In terms of acquiring your 'Crystalline Body' or 'consciousness', you learned that aligning yourself with this Divine energy is self-mastery at the highest level of connectivity. The many aspects of Christ Consciousness Awareness is a path, not just a teaching; and, it is present in consciousness to further your connection with Source.

Finally, you learned that in 'channeling' and the burgeoning use of 'telepathy', you can cultivate a pure and clear connection with all the Realms of Light as well as with the Father-Mother One. It is the joy of all this divine work that has been blossoming in you over the many weeks of our Master Class.

Now, it is time to consider even more advanced practices of Connectivity. It begins with the understanding of 'Developing a Full Spectrum Relationship with God'. Once you come to understand this most important step upon your path, you will begin to put all the puzzle pieces together that compose your personal ascension or 'path consciousness'. Much of what is done on Earth is elementary, even though you may feel that you have had a mighty struggle to get even as far as you have come. But, dear ones, it is only the sixth and seventh steps upon your ascension ladder; there are 345 additional steps before full integration with Source. Once you complete your planetary ascension there are five more levels to integrate: solar, galactic, inner-galactic, universal and multi-universal. And even so, the work that you do here on the earthplane, especially in understanding all the levels and the Divine Light necessary to continue onward and upward, you will always have that immediate connectivity.

Some of the advanced tools you will now have include many of those you have already been practicing. But these include:

- 1) keeping a meditative mind all day long, in addition to your daily meditation and invocation practices;
- 2) cultivating more Light and Love in your field of radiance, especially now that you are aware of the ascension seats and chambers of Light;

3) Using prayer and a constant devotion to Source and Service is yet another vital tool in your ascension tool kit;

4) activating, anchoring and actualizing your 50 planetary chakras at the fourth dimensional level, then your 100 chakras at the cosmic level.

Of course, there are many more chakras you can activate and anchor, and indeed, you will eventually do as many as 330 chakras at various dimensional levels.

You will also come to recognize the importance of daily devotion to strengthen and enhance your direct conduit with the Father-Mother. You will come to use these ascension techniques as easily as you breathe, and the more you come to understand and bring these into your enlightened life, the more Heaven will shower you with more knowledge, more opportunities, more advancement into your next stage of Divine Awareness. Remember, dear ones, it is all about the 'increase' of Christ Consciousness Awareness. And, once you are on this upward path, little can deflect you. Only by your intent can you linger at the lower levels of consciousness. Because now that God is aware of you, and make no mistake, the *Divine Mind* is quite aware of you.

So, here you are on the Earthplane, ready to do service to God in Life, ready to become a divine conduit for God, ready to embrace all that Heaven shall send you. And all you need to do to assure yourself of self-mastery is:

- 1) trust that all is as it is; put away self-doubt and self-criticism;
- 2) turn everything over to your Higher Christ-Self; and, above all,
- 3) ask the Ascended Masters to assist you.

You are, after all, a part of the Spiritual Hierarchy of Earth, a realization that will be made much clearer to you tonight

So I Serapis Bey, give you all my Love and Support and bring you each the special blessing of the Ascended Masters who are the Spiritual Hierarchy and part of the Greater Great White Brotherhood of Light that Lord Melchizedek has created for all to experience.
